BTI1341 / Fall 2023/24

1 Log-Structured File Systems

Conduct the simulation homework from *OSTEP, Chapter 43*, found at [ost].

Notes:

- The `tt` command seen in Question 4 is probably a typo and can be ignored (simply use “`./lfs.py`” instead of “`tt ./lfs.py`”).
- The seed (“`-s 1000`”) used in Question 11 may lead to an error, use a different one (e.g. 100).
